Comment:

	<p>Inspection Doc. #682500746 required operator to reclaim location, including the establishment of vegetation with a total perennial non-invasive plant cover of at least eighty percent. Location remains predominantly undesirable weedy plant species such as cheat grass. Large, unvegetated areas remain; no indication that reclamation activities had occurred per the corrective actions from Inspection Doc. #682500746. See attached photos. Musk thistle rosettes presents, and stalks from 2016 growing season found on location. Musk thistle is a Colorado State listed Noxious Weed and needs to be managed.</p>	
Corrective Action:	<p>Original corrective action and corrective action date remains in place: Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture that matches the adjacent pastureland or a seed mixture requested by the landowner. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed. Revegetation activities shall be complete no later than 6/10/2016.</p>	Date 06/10/2016
<p>Overall Final Reclamation <input type="checkbox"/> Well Release on Active Location <input type="checkbox"/> Multi-Well Location <input type="checkbox"/></p>
