1120 Lincoln Street, Suite 801
Denver, Colorado 80203

RE: Kinder Morgan CO2 Company, L.P.
Rule 523.e. Voluntary Self Disclosure – Fourth Quarterly Report

Dear Director Lepore:

Kinder Morgan CO2 Company, L.P. ("Kinder Morgan") (Operator No. 46685) hereby provides the Colorado Oil and Gas Conservation Commission ("COGCC" or "Commission") with this fourth quarterly status report to its Rule 523.e. voluntary self-disclosure made on February 17, 2016. This fourth quarterly status report follows the first quarterly status report of June 30, 2016, the second quarterly status report of September 30, 2016, and the third quarterly status report of December 20, 2016, and provides an update regarding the status of certain drilling pits located in Montezuma and Dolores Counties, Colorado, which either required soil sampling, were closed pursuant to BLM requirements, or were drilled without a pit and closed with a Form 27. The attached table labeled "Exhibit A – March 2017 Status Table" provides a summary of the status of the subject pits as of this fourth quarterly status report.

As previously reported, the COGCC has approved all Form 27s for the 25 pits requiring a Site Investigation and Remediation Workplan. As of the date of this fourth status report, Kinder Morgan has completed the soil samples at all fee locations and received approved Supplemental Form 27As confirming No Further Action and pit closure on a total of 6 sites. Kinder Morgan has submitted a Supplemental Form 27A for No Further Action contingent upon landowner variance approval to leave the liner in place on 5 sites and awaits landowner approval on 1 site prior to submitting the Form 27A for No Further Action. Supplemental Form 27As are being prepared for submittal to the COGCC for various remediation actions and re-sampling events on 12 sites with closure to be requested when target contaminant concentrations are less than the Table 910-1 levels and contingent upon landowner variance approval to leave the liner in place. A Supplemental Form 27A is being prepared for submittal to the COGCC for the installation of monitoring wells to assess shallow groundwater impact on 1 site.

For those sites where contamination is present, Kinder Morgan has worked closely with the COGCC Staff regarding any required remediation and monitoring. In addition, Kinder Morgan has contacted the majority of the landowners at sites where pit liner material is present to request waivers to leave the liners in place and/or discuss plans for additional monitoring and/or remediation, if required. As of the date of this status report, Kinder Morgan has received several signed waiver agreements from landowners consenting to leaving the pit liner in place, and Kinder Morgan plans to submit a variance request to the COGCC upon receipt of waivers from all consenting landowners.

Kinder Morgan continues to work diligently to close all of the remaining pits subject to its voluntary self disclosure and appreciates the COGCC Staff's feedback and continued discussion. Kinder Morgan will submit its fifth quarterly report on or before June 30, 2017, and will supplement this report with additional information if necessary. If at any time you or the COGCC Staff has questions or would like additional detail on any item, please let me know by contacting me at 713-369-9113 or ken_havens@kindermorgan.com.

Sincerely,

A handwritten signature in blue ink, reading "Kenneth H. Havens Jr.", with a large, stylized flourish extending from the end of the signature.

Kenneth H. Havens Jr.
Vice President of Source and Transportation

LEGEND

- * signifies wells that were part of the 2011 final settlement between KM and COGCC
- Category 1 signifies wells for which testing and landowner approval did not take place per the COAs or no pit permit obtained
- Category 2 signifies wells located on BLM land where KM completed remediation per BLM requirements
- Category 3 signifies wells drilled with closed loop
- Category 4 Kinder Morgan has reviewed all wells previously in category 4 and moved them to category 1 or 2 if appropriate
