

**Photo 1:** View of the project area from the northern entrance to the well pad facing center. Well and Production facilities are on large gravelled pad. Outer areas are revegetating.

**Photo 2:** View of the northeastern portion of the project area from the working area edge facing northward. Revegetation is largely comprised of grasses such as western wheatgrass (*Pascopyrum smithii*) and smooth brome (*Bromus inermis*).

**Photo 3: View of the southwestern portion of the project area from the southern edge facing northwestward.**

**Photo 4: View of the northwestern portion of the project area from the northern edge corner facing southwestward.**
