General Comment:

Environmental**Spills/Releases:**

Type of Spill: PRODUCED WATER

Estimated Spill Volume: 0

Comment: Permitting inspection for CE&P facility by Craig Burger and Stan Spencer of COGCC. No visible tears or punctures in liner. No free floating product on water surface. Fence and netting in good condition with no visible breaches. One pipe at south end of pit is in contact with liner. Small stormwater detention pond at NE corner is dry. Pond outfalls to Smith Gulch but appears to have seepage onto pad through or around culvert which has no visible opening/discharge from within SW pond

Corrective Action: Raise pipe to eliminate contact with liner. Address potential drainage from SW pond to prevent run on to pad/pit.
