Michael,

I have reviewed the referenced Amended Form 2A Oil & Gas Location Assessment and have the following comments.

- 1) In the Construction section you have indicated the date planned to commence construction is 2/7/17. What does this date represent? An aerial photo from 2015 shows what appear to be production facilities already on this Oil & Gas Location. See attached.
- 2) In the Cultural Setback Distance section you have indicated the nearest Above Ground Utility is 380 feet from both a well and production facility. At this distance it should also be identified on the Location Drawing. Additionally, an aerial photo from 2015 shows what appear to be some production facilities on the pad and the Razor 10E Freshwater Pit immediately adjacent to the east (see attached). Please revise the Location Drawing to include all of these surface improvements that are on the pad and within 500 feet from the edge of the disturbed area.
- 3) Given the changes in this Oil & Gas Location since it was last permitted in 2013, please provide updated Location Pictures.

Please respond to this correspondence by April 14, 2017. If you have any questions, please contact me. Thank you.

Doug,

I have attached updated location photos and an updated location drawing. Let me know if you need any additional information. The date of construction was approximately 1/2/15.

Thanks,
Michael L. Brown

Michael,

Will you add to the Location Pictures attachment the date they were taken.

Also, what does the construction start date of 2/7/17 on the Amended 2A refer to? Is that when the production equipment was added to this location or were they added back in 2015 when the first well was drilled?

Doug,

I have attached the location pictures with the date taken.

The date the location was constructed was 1/2015.

I believe the equipment was added 1/2016.

Please add the following comment:

This amended 2A is being submitted to update the production facilities already installed on location. Interim reclamation is in process and no additional equipment or disturbance is planned at this time.

Thanks,
Michael L. Brown
