Birds				1		2
Mammal				1		
Reptile						
Fish						
Other						

Field Operations Update:

- Scrape top layer of contaminated soil in Division 1. Load recovered soil into dump trucks to take to land farm.
- Conduct pumping of the liquid from Division 2 to Division 3 for collection operations in Division 3.
- Build access road into Division 2 for removal of contaminated dirt.
- Conduct brooming operations of liquid in Divisions 2 and 3.
- Water washing operations in Division 3 from drip trap 18 to siphon 5.
- Water washing operations in Division 3 deep ravine.
- Decontamination stations established and working in Divisions 1, 2, and 3.
- Deploying wildlife deterrents in identified areas.

DAILY SCAT REPORT

SCAT surveys were conducted from 00+00 through 03+4800 and involved a total of ~4,800 feet of stream corridor. Surveys focused on delineating and categorizing areas of retrievable oil utilizing a Trimble® Geo Series Global Positioning System (GPS) receiver. Continuous oiling was observed throughout the entire area surveyed, with varying widths and thickness.

General status of oiling observations in Blacktail Creek to-date include the following:

SCAT Divisions	Oil Distribution*	Thickness	Oil Type*	Oil Area Width*	% Cleaned	Cleanup Actions Taken to Date	Comments
1	Continuous	TO/CV	Fresh oil	Wide, medium and narrow	~25%	Broom crews, trash pumps, vac trucks, excavation	Excavation had occurred to ~SCAT segment 1+350 as of 1400, 3/9/17
2	Continuous	TO/CV	Fresh oil	Wide, medium and narrow	~<5%	Broom crews, trash pumps, vac trucks	~% cleaned accounts for broom crew activity
3	Continuous	TO/CV	Fresh oil	Wide, medium and narrow	Undetermined	Drip trap, Siphon	Broom crews or flushing will be needed in this division due to access issues
4	NA	NA	NA	NA	NA	NA	---
*SCAT terminology is based on the standards and guidelines provided by NOAA in the document: http://response.restoration.noaa.gov/sites/default/files/manual_shore_assess_aug2013.pdf
