## RECLAIM-O

### SOIL RECLAIMANT

#### Optimum Performance

- **ReClaim-O** is a biodegradable soil reclaimant, which works well in both oil and salt-water contamination or spills.
- **ReClaim-O** does not contain bacteria, but does attract native in-situ bacteria to attack the oil droplets for in-situ bioremediation.
- **ReClaim-O** contains no chlorinated hydrocarbons.
- **ReClaim-O** allows oil spills to be remediated on site without having to scrape and replace the soil.
- **ReClaim-O** may also be used in lakes, streams, or other water areas.

#### Typical Physical Properties

- Form:.....Liquid
- Solubility:.....Water
- Specific Gravity:.....1.0075
- pH:.....ND
- Bulk Density:.....ND

#### Application

- **ReClaim-O** is mixed as follows: 1 gallon **ReClaim-O** with 1-barrel fresh water.
- Use 1 barrel of **ReClaim-O** / water solution for each barrel of oil to be dispersed.
- Spray onto contaminated soil, which forms a milky emulsion. Allow the emulsion to soak into the soil.
- On silty soil or weathered crudes, till the soil before the **ReClaim-O** / water solution is applied.

#### Handling/Safety

- **ReClaim-O** is available in 55 gallon drums and in bulk. Material Safety Data Sheets are available outlining safe handling practices.

#### Technical Sales & Service Hotline

1-888-486-1551

FAX: (800) 504-2141

8:00 am CST to 5:00 pm CST. To reach a sales representative or for basic product information, availability, pricing, billing, and order status.
