COMMENTS:

Request an Injection PSI Increase from the current 1556 psi to 2000 psi. Pressure of 2000 psig is based on the frac gradients in the area. Additionally this is a Lyons well only and has no injection in the lower DJ injection zones. The current pressure of 1556 psig did not include friction pressure and we have done enough step rate tests in the area to know that 2000 psig is a safe injection pressure.
