Please find attached a recent letter sent to Kinder Morgan in regards to their CO2 activity in the Doe Canyon area. Kinder Morgan currently has drilled two well sites (Doe Canyon 2 and 5) on my property and did not complete the reclamation work as per their agreement and State requirements. It is our understanding the COGC is working with Kinder Morgan to complete the remediation of these two well sites. As a landowner, I just want to make you aware of other issues we have had or continue to have with Kinder Morgan.

Additionally, Kinder Morgan is wanting to drill another well on my property which is located along the pristine Dolores River rim. (see attached map). We are against this proposed location to to the proximity to the River rim and their past practices. We realize they may have "lease" rights but would like to have the location changed and a much smaller footprint for the new request.

Please don't hesitate to contact me with questions or additional information.

Thank you!
