COMMENTS:

Enerplus is requesting approval to flare production gas prior to arrival of a gas pipeline at the Maple 8-67-36-25C well. This is a wildcat well and currently there is no pipeline infrastructure available near this well. Once the well comes online, Enerplus will assess the viability of the well to support additional infrastructure and at that time determine whether to continue production and when to connect to pipeline. If Enerplus determines the well can support further development, a pipeline will be constructed as soon as practicable.
