Subject: FW: ASBURY V 3-19 - 05-123-25086 SAFETY PREP NEEDS CEMENT

Diana, I left you a voice mail regarding the subject well.
For the reasons stated below we need to pump cement to remediate a hole in the casing.

Please let me know if you approve so we can proceed.

Thank you for your help.

Subject: ASBURY V 3-19 - 05-123-25086 SAFETY PREP NEEDS CEMENT

Good Afternoon Diane, we are currently rigged up on the subject well to perform a Safety Prep for offset HZ Fracs. The original plan was to replace the wellhead, however we found holes in the production casing while pressure testing.

Can you please let me know if you approve of the following remedial cement work to resolve the problem?

- SET CIBP OVER CODELL @ 7500'
- BALANCE PLUG OF 15 SCKS 1.53 YLD TO 7250' TO COVER HOLES @ 7352'

Thank you for your help.
