General Comment:

This is a Reclamation focused Inspection. Inspection was prompted by Variance Request Doc#401103990 submitted by Operator asking for Variance of Final Reclamation; leaving Pad un-reclaimed for Land Owner use as Agricultural Storage site. This inspection is to document conditions and compliance with Stormwater, Erosion and Noxious Weed 1004 series Rules. A Final Reclamation Inspection will be conducted if Variance is approved.

Landowner stated that use of the Pad was now an integral part of his Farming Operation. They are now producing Organic Alfalfa Hay for Dairies on the Front Range which has to meet the highest standards. The buildings erected on the Location now provide safe, dry, covered storage for the Hay. In prior years hay had to be stacked in field & quality would deteriorate making it unacceptable to the Dairies.

Comment: Three large Fabric Hoop/ clear Span Barns have been installed on site. Pad is Well compacted and has no Dust, erosion, or Weed concerns. Perimeter Berms have leveled to allow for Farming up to Pad boundary on North & East sides. West and south sides have low tilled berm in place to divert any run off or waste water to drainage South of Pad. Land Owner has installed tall Hay Yard fencing around Site.
