Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No \_\_\_\_\_

## SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

THE SOURCE AREA WAS PREVIOUSLY EXCAVATED AND IMPACTED MATERIAL WAS TRANSPORTED AND DISPOSED OF AS DESCRIBED IN THE FORM 19 AT A LICENSED DISPOSAL FACILITY.

## REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Monitored natural attenuation (MNA) was implemented as the selected remediation strategy during the first quarter 2016, and will continue as the selected remediation strategy through the first quarter 2017. Quarterly groundwater monitoring will be completed until four consecutive quarters of BTEX concentrations in compliance with regulatory standards are achieved.

### OPERATOR COMMENT

Based on historic analytical results, PDC Energy is requesting a reduction in the quarterly monitoring well network. Monitoring wells BH03 and BH04 have exhibited eight or more quarters of constituent concentrations below COGCC Table 910-1 groundwater standards (Figure 2). Contingent on COGCC approval, removal of the selected monitoring wells would be conducted in the second quarter 2017.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
