General Comment:

Environmental**Spills/Releases:**Type of Spill: PRODUCED WATEREstimated Spill Volume: 0

Comment: Pre-Form-28 permit approval inspection by Craig Burger and Stan Spencer of COGCC. Weather is clear, 60F. Pit has ~3-4' freeboard. Liner appears to be in good condition with no punctures or tears in visible portion. Chain link fencing and netting in good condition with no visible tears. 2X500 bbl gunbarrel and 1x200 bbl condensate tanks appear to be new installation, are empty and unlabeled. Used older tanks are empty and staged on NW corner of pad. Erosional slump on cut slope above pad at south corner.

Corrective Action: Label new tanks. Remove any tanks which are no longer in use. Maintain erosion control BMPs on cut slope to prevent sedimentation and excess run on to pad.
