Land Use: \_\_\_\_\_

Comment: Project area is surrounded by pinion juniper woodland and sagebrush shrubland. Revegetation is progressing within portions of the interim reclamation areas. However, revegetation in the western portion of the interim reclamation area is sparse. This needs to be monitored during the 2017 growing season and re-seeded in fall 2017 if vegetative cover is not increasing.

Comment: Deep rutting and damaged vegetation from truck tracks at the well pad entrance, observed during the 2015 inspection, is essentially in the same condition and not repaired or revegetated. This is the second corrective action for deep ruts and destroyed vegetation as this has not been addressed. See attached photos.

Corrective Action: Repair and stabilize rutting near the entrance to the well pad. Areas with damaged vegetation need to be repaired and re-seeded.
