General Comment:

COGCC Engineering Integrity Inspection performed on May 2nd, 2017 in response to initial form 19 spill report Doc #401265919 received on 04/26/2017 that outlines: A separator rupture disc malfunctioned and sprayed oil to the West towards the house adjacent to the facility. It is estimated that the wind blew between 5 and 7 bbls of oil over a small field of grass/marshy area. The details of observations made during this field inspection are available in the equipment section of this report. Photo's uploaded can be accessed via link(s) at the end of this report.

Comment:

Spill response efforts were completed prior to this field inspection. Remediation activities are in progress. There were no Bayswater employees or contractors on site at the time of this field inspection. Note: Document and retain records of root cause of failure evaluation, measures taken to prevent the problem from reoccurring and description of all equipment repairs completed; Indicate which wells are serviced by the faulty/ repaired equipment (*add this information on to the supplemental form 19); Confirm integrity of repairs completed prior to returning equipment to service.
