

**Photo 1:** View of the project area from the southwestern corner facing center.

**Photo 2:** View of the southern portion of the project area from the southwestern corner facing eastward. Revegetation is largely comprised of rubber rabbitbrush (*Chrysothamnus nauseosus*) and weeds such as cheatgrass (*Bromus tectorum*) and yellow tumblemustard (*Sisymbrium altissimum*).

**Photo 3: View of the western portion of the project area from the northwestern corner facing southward.**

**Photo 4: View of the tank battery at the entrance to the access road to the well pad. Area in the foreground appears to have recently seeded and straw mulched.**

**Photo 5: View of germination occurring, although sparse, in the seeded area in Photo 4.**

**Photo 6: View of whitetop (*Cardaria draba*) in the southern portion of the project area.**
