Comment: It appears the Operator has installed stormwater and erosion control BMPs throughout the location in a manner to minimize erosion, transport of sediment offsite, and site degradation. At the time of this inspection, the location was still under construction. Per conversations with the Operator, ditch and berm BMPs will be directed to the sediment basin upon completion of the location. Per conversations with the Operator, all stockpiles will be seeded, straw mulched and crimped upon completion of the location. BMPs should remain in place and in proper functioning condition until the location reaches final reclamation.
