COMMENTS:

TEP requests approval to install 1-300 BBL condensate tank on the DOE 1-M-35 pad. This tank will be contained in a 28 ft. x 28 ft. lined containment ring. The purpose of this tank is to contain the condensate production from lease COC 50783. Currently, the condensate coming from this lease on this pad is piped to the Hayes Tank Facility but the integrity of the 2" steel line being used is coming into question so a tank on pad is the preferred method of storage.
