Comment:

Inspection #682401035 documented that associated facilities have not been properly reclaimed, that both the tank battery and well location have not been reclaimed. All pipe and production facilities from the battery have been removed, however, battery location has not been reclaimed; fence remains, adjacent reference area is cropland. Battery has not been returned to cropland. Sundry doc. #401101464 stated "Final reclamation will begin on 12/5/2016 to allow time for crop to be harvested. One all locates clear. All disturbed areas will be cross ripped to alleviate compaction. The scheduled reclamation work is estimated to be completed by 12/19/2016." Unable to find evidence that locations had been been cross ripped or had reclamation worl

Corrective Action: **Perform reclamation in accordance to COGCC 1004 series reclamation rules and requirements. CA date of 8/24/2016 remains in place.**

Date **08/24/2016**

Overall Final Reclamation

Fail

Well Release on Active Location ☐

Multi-Well Location ☐

COGCC Comments

Comment	User	Date
The surface owner appears to be storing equipment at the battery location. If operator does not intend to perform reclamation and to leave the battery location "as is" for the surface owner, a 502.b variance to not perform reclamation will need to be submitted and approved by the COGCC.	trujilloam	05/30/2017
Well location and adjacent areas to the south do not appear to be cropland and do not appear to be actively farmed. It is unclear as to what the final land use is.	trujilloam	05/30/2017
