Amanda,

Thanks for the update. No need to send a Sundry. I will upload your email to the Federal 11-90-24 #1  
COGCC Location ID #324469  
Spill/Release Point ID #77330

And yes, please keep me updated.

Have a great Memorial weekend,  
Carlos

Thane and Carlos,

I'm writing to give you an update with our progress and decisions on improvements to the secondary containment at the Federal 11-90-24 #1. We have ordered all necessary equipment to replace the earth berm with a steel rig containment, including the installation of a 30 mil liner.

Installation procedures include:

- Removing tanks and temporarily storing them on-site;
- Level the existing earth berm over the existing containment area;
- Install liner, steel rig according to manufacture specs;
- Replace tanks;
- Update SPCC drawing;
- Other procedures as necessary.

Heavy equipment will be used on location during project improvements. SG will give required 48-hour notice to BLM prior to start of project ground work. SG plans to begin this project in August, however if delayed, it will be installed prior to December 1, 2017. I will keep you updated. Please let me know if COGCC or BLM would like this update submitted in a Sundry.

Please let me know if you have questions or would like to discuss.

Thank you,

Amanda
