1	<p>I would like to make mention that Crestone created this particular TCA without first completing and waiting for this permit to be submitted and completed. This TCA was created in 2015 after Encana pulled out of the Pratt site when they could not drill a well without disturbing the peace and quite of the two adjacent neighborhoods. While it appears that they are getting ready to start drilling at the Waste Connection pad site and this TCA is planned on being used for its completion, they should not be allowed to start any drilling until all permits have been approved for the process. Also, if this permit is approved, I would expect that they put in place appropriate sound mitigation up. As most of the noise coming from the completions process is in the C scale, I would expect that the COGCC make sure to enforce the limits allowed. I do not, nor do my neighbors wish to be trespassed with this noise for the next 6 months or more. We are not even going to be able to enjoy our outdoor time or able to leave our windows open at night without being disturbed.</p>	05/01/2017
2	<p>CPW has mapped burrowing owl habitats located in and near this proposed development.</p> <p>Therefore, CPW recommends that the operator (or its biologist) conduct an initial site visit to determine if there are prairie dog burrows (for burrowing owls) in and near the site boundaries.</p> <p>If prairie dogs are present, then CPW recommends that the operator survey for burrowing owls if initial site disturbance will occur in prairie dog towns during the owls nesting season (March 15 through October 31). Burrowing owl survey protocol can be found here: https://cpw.state.co.us/Documents/WildlifeSpecies/LivingWithWildlife/RecommendedSurveyOwls.pdf</p> <p>CPW appreciates the collaboration, as we strive for responsible energy development while protecting sensitive habitats.</p> <p>Should the operator have any questions and/or request a site visit with CPW, please contact CPWs Northeast Region Energy Liaison (Brandon Marett) at (303) 291-7327.</p>	05/12/2017
