<b>Location of Concern</b>	I live within 0.5 miles of the Waste Connections drilling site operated by Crestone
<b>Do you know who the oil and gas company is? If so, please specify and if you contacted them already please indicate that and who you talked with.</b>	Crestone -- they don't respond to phone calls so I don't waste my time any more. My husband tried calling them the other day, but they never returned his call (shocking).

<b>Detailed description of the issue or issues.</b>	,This morning at 5am when I went into my backyard with my dog, I was hit by an overpowering petroleum smell (yet again). It irritates my nostrils, sinuses, and back of my throat. It causes me to take shallow breaths. The odor was also present last night around 9:30pm (when I also took my dog outside). But I was too tired and went to bed without filing a complaint. This whole week, the odor has been present more than it has been absent. It

	<p>impacts every aspect of my life -- causing stress, preventing me from spending time out doors (as I must cut the time short), preventing me from being able to open my windows. The odor is a nuisance. At what point will the COGCC step up and enforce it's own rule about oil and gas companies not being allowed to create a nuisance through odor?</p>

<p><b>Have you contacted any other agencies or local governments related to this issue or issues? If so, please provide details.</b></p>	<p>I spoke with someone at the CDPHE last week. After my initial complaint COGCC emailed me and CDPHE called me. Since that time, I think each of my complaints just get compiled with the others, and I am not convinced that anyone looks at them any more. Please prove me wrong.</p>
