Denver, CO 80202

**Subject: Herzberg No. 1 Landfarm Sampling Results
COGCC Remediation #9055**

Dear Terry:

Nicholson GeoSolutions LLC was retained by HRM Resources II LLC (HRM) to conduct soil sampling of the landfarm on the Herzberg No. 1 lease, Washington County, Colorado. Sampling of the landfarm was conducted at the required rate of approximately one sample per 100 yards of material on October 21st, 2016. The landfarm was previously sampled on October 18th, 2015 and May 25th, 2016.

GPS mapping showed that three landfarm cells cover a total of about 0.30 acres and contain an estimated 730 yards of material. A total of 10 discrete soil samples were collected at depths of approximately 12-16 inches. These samples were collected from approximately the same locations as those previously collected. The extent of the landfarm cells and the locations of the samples are shown on Figure 1.

All samples were analyzed for Total Volatile Petroleum Hydrocarbons (TVPH – gasoline range), Total Extractable Petroleum Hydrocarbons (TEPH – diesel and motor oil range), BTEX (benzene, toluene, ethylbenzene, and xylenes), sodium adsorption ratio (SAR), pH, and conductivity to evaluate compliance with the COGCC Table 910-1 standards and further treatment needs.

Table 1 provides a summary of the analytical results for the samples. The laboratory report is contained in Appendix A. For the October 2016 sampling event, the sum of the concentrations of gasoline, diesel, and motor oil range petroleum hydrocarbons (total petroleum hydrocarbons [TPH]) exceeded the COGCC standard of 500 mg/kg for nine of the 10 samples and ranged from 182.7 mg/kg to 57,702 mg/kg. In addition, pH exceeded the standard for one sample. All SAR and conductivity results were below the standards.

Table 1 Herzberg No. 1 Landfarm Sample Results – October 21, 2016

	Table 910-1 Standards	Herzberg LF-1	Herzberg LF-2	Herzberg LF-3	Herzberg LF-4	Herzberg LF-5

sp. conductance (mmhos/cm)	<4.0	0.916	1.06	0.798	0.719	0.772

¹The standard is 500 for the combined total of TVPH and TEPH All units in mg/kg except where indicated

J = estimated concentration UJ = estimated detection limit

Values in bold type exceed standards

Table 2 provides the TPH results for the October 18th, 2015 and October 21st, 2016 samples and the percent difference between the two samples at each sample location. TPH ranged from 3,990 mg/kg to 27,716 mg/kg for the October 2015 samples and from 182.7 mg/kg to 57,700 mg/kg for the October 2016 samples. The TPH concentration was lower for the October 2016 samples at eight of the 10 sample locations and higher at two locations.

Table 2 Comparison of TPH Results, October 18, 2015 and October 21, 2016

Sample Location	TPH (mg/kg) October 18, 2015	TPH (mg/kg) October 21, 2016	%Difference
Herzberg-LF-1	10,557	3,750	-64.5
Herzberg-LF-2	9,718	7,140	-26.5
Herzberg-LF-3	17,100	7,360	-57.0
Herzberg-LF-4	9,000	4,580	-49.1
Herzberg-LF-5	3,990	182.7	-95.4
Herzberg-LF-6	10,752	4,050	-62.3
Herzberg-LF-7	5,323	7,600	42.8
Herzberg-LF-8	27,716	57,700	108.2
Herzberg-LF-9	24,152	3,243	-86.6
Herzberg-LF-10	7,340	7,220	-1.6

Table 3 provides summary statistics for the two sampling events. The average TPH concentration for the 10 samples dropped from 10,073 mg/kg to 4,603 mg/kg between October 18th, 2015 and October 21st, 2016. The median concentration dropped from 9,718 mg/kg to 4,580 mg/kg. Using the results provided above in Table 2, the average % TPH reduction for the overall landfarm was -54.3%.

Table 3 Summary Statistics for the October 2015 and October 2016 Samples

Sample Date	Minimum	Maximum	Average	Median	Average % Difference
Oct 18, 2015	3,990	27,716	10,073	9,718	
Oct 21, 2016	183	57,700	4,603	4,580	-54.3

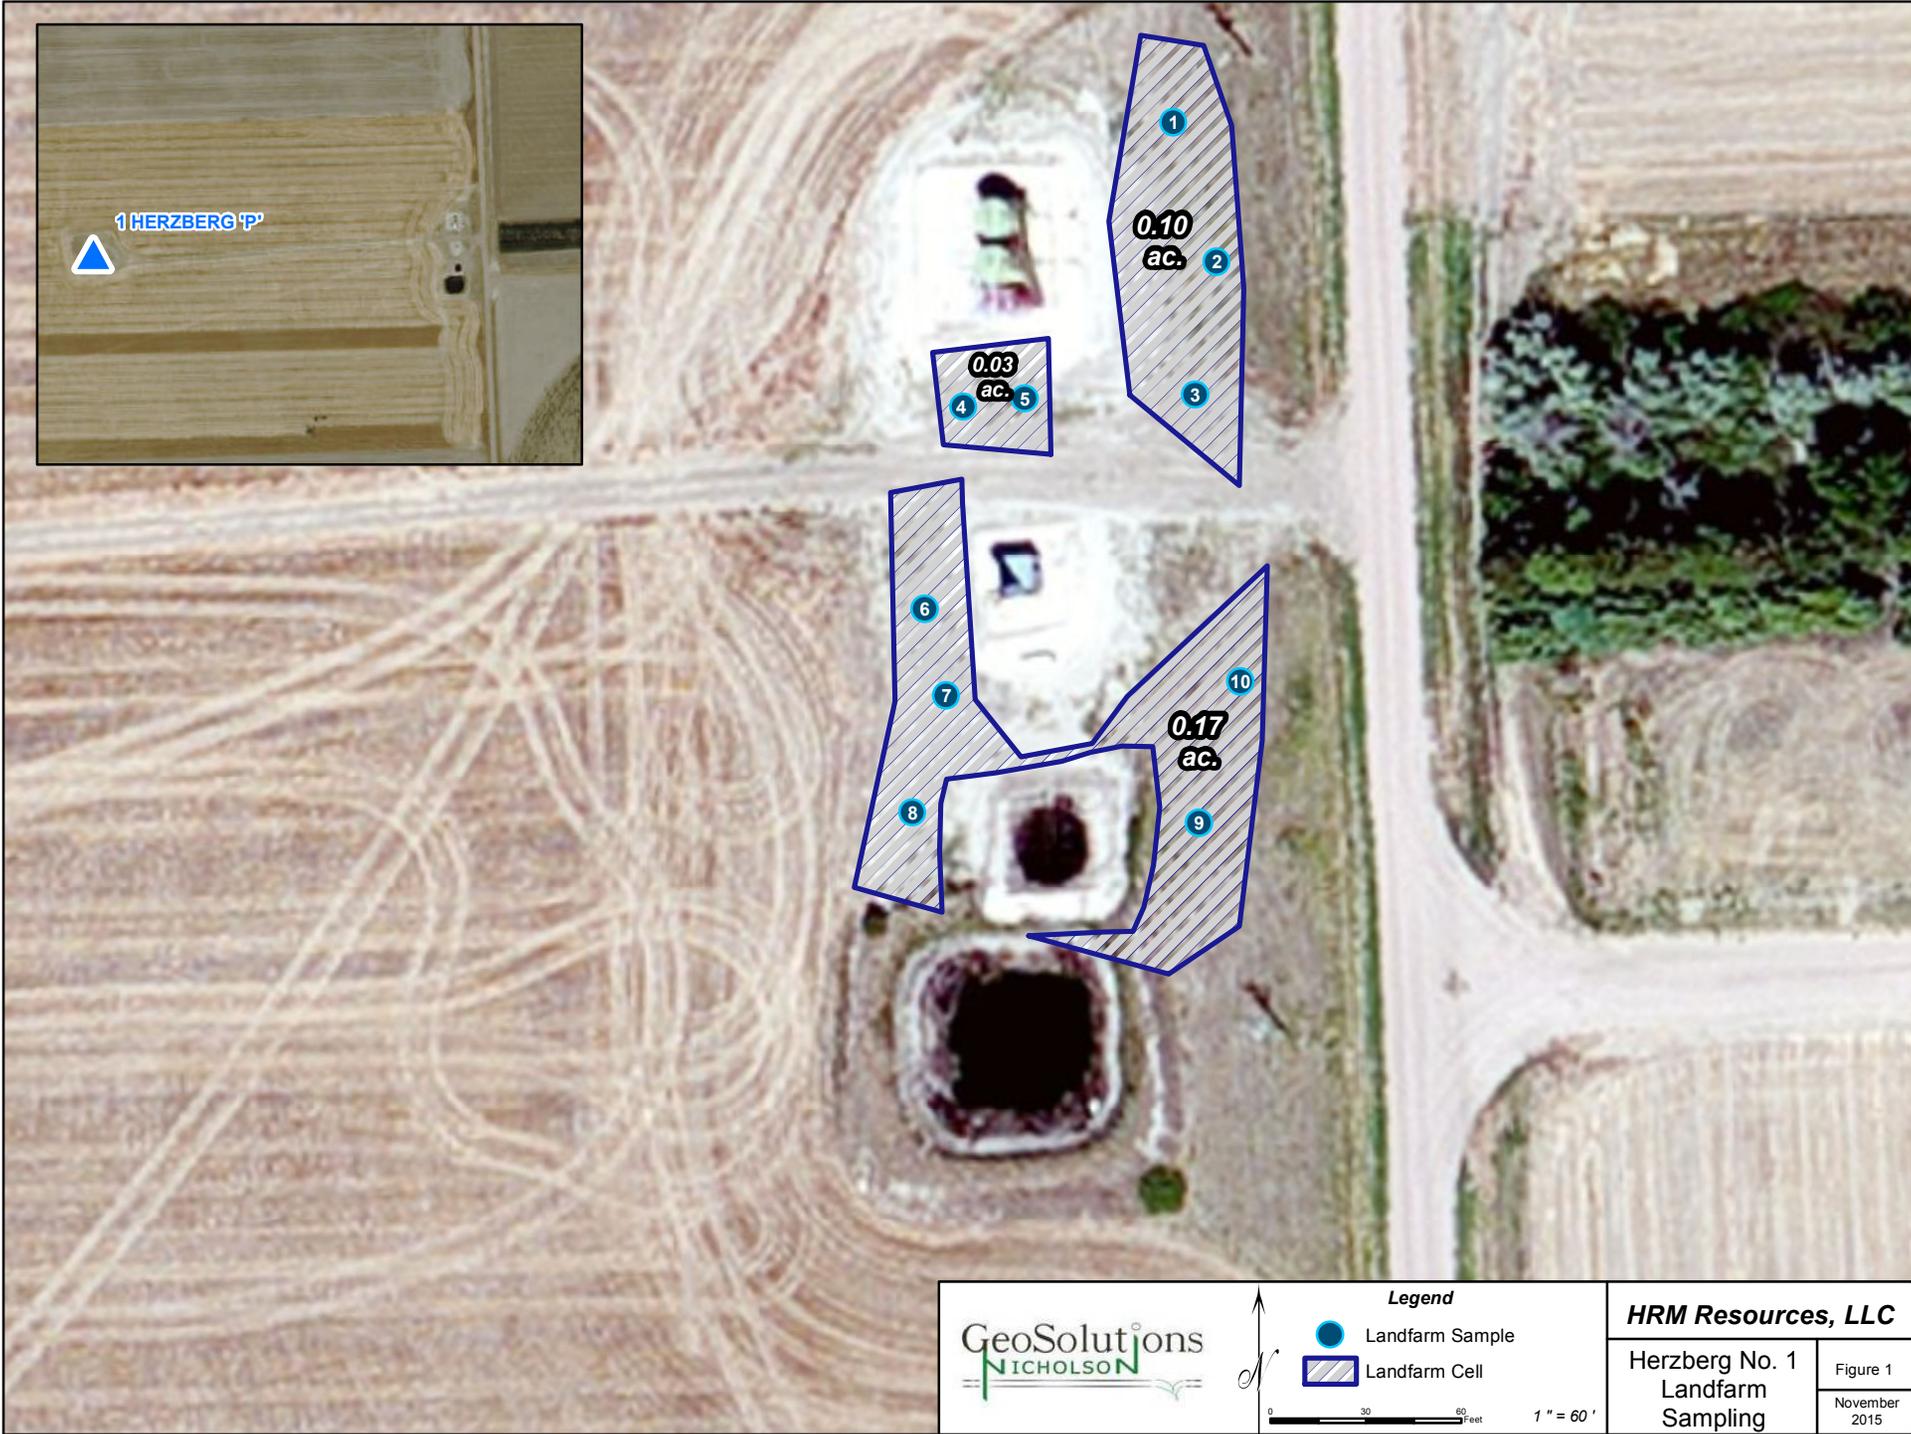

Using the difference between the average TPH concentrations of 5,470 mg/kg, and the time period of 368 days, a biodegradation rate of 14.9 mg/kg-day is obtained. Using these data, approximately 334 days of treatment remain to reach the standard of 500 mg/kg.

Based on the analytical results, bioremediation of the TPH contained in the soils in the landfarm cells at the Herzberg No. 1 lease is occurring. Tilling of the landfarm was performed on March 9th and August 12th during 2016. Additional treatment of the landfarm cells including tilling will be conducted prior to the next sampling event in May 2017.

Abbreviations and Definitions

SDG	Sample Delivery Group.
MDL	Method Detection Limit.
RDL	Reported Detection Limit.
ND	Not detected at the Reporting Limit (or MDL where applicable).
U	Not detected at the Reporting Limit (or MDL where applicable).
RPD	Relative Percent Difference.
Original Sample	The non-spiked sample in the prep batch used to determine the Relative Percent Difference (RPD) from a quality control sample. The Original Sample may not be included within the reported SDG.
(S)	Surrogate (Surrogate Standard) - Analytes added to every blank, sample, Laboratory Control Sample/Duplicate and Matrix Spike/Duplicate; used to evaluate analytical efficiency by measuring recovery. Surrogates are not expected to be detected in all environmental media.
Rec.	Recovery.

Qualifier	Description
J	The identification of the analyte is acceptable; the reported value is an estimate.
J1	Surrogate recovery limits have been exceeded; values are outside upper control limits.
J3	The associated batch QC was outside the established quality control range for precision.
J6	The sample matrix interfered with the ability to make any accurate determination; spike value is low.
J7	Surrogate recovery cannot be used for control limit evaluation due to dilution.

ESC Lab Sciences is the only environmental laboratory accredited/certified to support your work nationwide from one location. One phone call, one point of contact, one laboratory. No other lab is as accessible or prepared to handle your needs throughout the country. Our capacity and capability from our single location laboratory is comparable to the collective totals of the network laboratories in our industry. The most significant benefit to our "one location" design is the design of our laboratory campus. The model is conducive to accelerated productivity, decreasing turn-around time, and preventing cross contamination, thus protecting sample integrity. Our focus on premium quality and prompt service allows us to be **YOUR LAB OF CHOICE**.
 * Not all certifications held by the laboratory are applicable to the results reported in the attached report.
