CORRECTIVE ACTIONS:

1 ☒ CA# 52596

Corrective Action: See attached photo documentation. Original corrective actions remain in place: Submit a Form 27 to Northeast Environmental Protection Specialist Rob Young (rob.young@state.co.us). Establish vegetation with total perennial non-invasive plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture that matches the adjacent pastureland or a seed mixture requested by the landowner. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed. Original CA date of 3/18/2016 remains. If Operator has a response to this inspection, provided it in the COGCC in the comments section of a Form 4 Sundry notice.

Date: 03/18/2016

Response: CA COMPLETED Date of Completion: 05/19/2017

Operator Comment: Form 27 was submitted to Rob Young on April 13, 2017 and approved on April 14, 2017. All pits were then closed, stained soil was scraped and disposed of at the Buffalo Ridge landfill, clean fill dirt and topsoil were brought in to bring pits up to grade, and finally reclamation seeding was done with a straw mulch crimp in on top for erosion control. All sampling and closure procedures were then submitted to Rob Young on May 30, 2017, who then approved and closed out the Form 27 project on May 31, 2017. Seed mixture was obtained from the NRCS and then approved by the landowner. Geotech productions will continue to monitor and manage the site for weed and erosion control until final reclamation has passed.

COGCC Decision: Approved pending re-inspection

COGCC Representative: Approved pending re-inspection of the FIR resolution acknowledges that the Oil and Gas Conservation Commission has received the Notice. It is not an acknowledgement that the corrective action has been passed. A field inspection will be conducted to evaluate compliance with COGCC standards.
