

Complaint #: 200442930

Inspection Document # 6674005342

Complainant Name: Lowell Lewis

Phone: (970) 405 7063

Address: 7303 18<sup>th</sup> Street, Greeley, CO

Nature of complaint (sound, noise, etc): Traffic Pattern Violation

Complainant contacted via phone at approximately 2:30 PM and discussed the situation.

Inspection details:

Visited and submitted inspection of the location at 2:00 PM on 6/16/17. Truck traffic was evident leaving location at the time of inspection; however there was not enough volume to cause the backing up of traffic at the location exit at the time of the inspection. Backhoe and front-end loader were active removing material from location.

Construction and traffic on 71<sup>st</sup> street exacerbates the problem by extending the time required for trucks to leave the location.

Spoke with security contractor at entrance to location concerning the complaint.

Spoke with operator personnel concerning the complaint, and they will follow-up with further communications with completions supervisors.

Drilling operations have been concluded and completions wellheads were being installed. No high capacity water tanks on location at time of inspection.
