Hi Rick,

I wanted to follow up to my voicemail I left. I wanted to make you aware of a historical release that was discovered late afternoon yesterday during a water pit removal at Synergy's Eldridge 4-23 well location (facility ID 24532).

I will file the Form 19 soon.

Thanks,

Brad M. Rogers

Hello Mr. Swain and Mr. Rudisill,

I wanted to make you aware of a historical water vault tank leak that was discovered late yesterday at SRC Energy's Eldridge 4-23 wellsite located at the SENE Sec 23 T6N R66W in Weld County. The release was identified after a 25 bbl. water vault was removed from location due to the well being P&A'd. Excavation work to determine the extent of impact is ongoing now. The volume of fluid that was released is unknown at this time.

Please let me know if you have any questions or require additional information.

Hi Brad,

Thank you for the notice. Note that since this is a produced water vessel removal, a Form 27 is also required. Contact me with any questions.

Rick
