CORRECTIVE ACTIONS:

1 ☒ CA# 73066

Corrective Action: This is the second corrective action for stormwater erosion within the project area as corrective actions are not sufficiently addressed. Diversions and roadside ditches need stormwater controls to de-energize stormwater flows and catch sediment. Culvert on the access road needs further stabilization as soil placed on top will only erode back into the drainage. Revegetation is needed where vegetation has been damaged or removed or to stabilize exposed soils. Corrective action date for corrective actions documented in December inspection will remain the same. Stormwater erosion needs to be controlled within the project area by May 15, 2017.

Date: 04/01/2017

Response: CA COMPLETED Date of Completion: 05/04/2017

The Storm water erosion mentioned above and shown in the pictures included in the inspection on the south-

Operator Comment: eastern portion, Western fill slopes and the access road where it crosses the drainage north west of the location were further repaired and disturbed soil was reseeded on 5/4/2017. See attached photographs documenting completed work.

COGCC Decision: Approved pending re-inspection
