1	Drilling/Completion Operations	TEP will run triple-combo open hole logs from well TD up to base of surface casing on one of the first wells drilled on a multi-well pad. Remaining wells on the pad will be logged with either cased hole pulsed neutron or triple-combo open hole. Every well will also have a CBL log from well TD up through well surface. Form 5 Completion Reports will identify wells on the pad with triple-combo open hole logs.

Permit	Although there is a producing well logged on this pad, the operator states that they prefer to run required logs on one of the first wells drilled from this new group. See BMP for logging Rule 317.p. Final review complete.	06/20/2017
Engineer	Offset water well check: Offset water well check: There are no permitted water wells within one mile of this proposed surface hole location. Operator's geologic prognosis indicates the proposed surface casing will cover the entire Green River formation.  Offset Well Evaluation: Existing offset oil and gas wells within 1,500 feet of this wellbore meet standards. No mitigation required.	06/15/2017
Permit	Lease map shows leased area in yellow and matches acres in Surface & Minerals section. Preliminary reveiw complete.	06/07/2017
Permit	Passed Completeness.	05/15/2017
