Detailed description of the issue or issues.	,Low-90's to mid-80's over the course of the nuisance this evening, with a light breeze blowing from the north. Chemical smell started at about 15:00 when a white tanker truck was spraying liquid on the access road to the Waste Connections pad site. Scent increased until about 16:15, then started to dissipate, only to resume again at 18:30. This second round started as the usual pattern of something like insecticide, increasing in pungency over 30-40 minutes to a strong blend of machine oil, diesel exhaust and rubber. At 19:30 it is strong enough to make eyes water.
Type of Complaint (Click all that apply)	Air Quality/Odor

<b>Detailed description of the issue or issues.</b>	,Low-90°s to mid-80°s over the course of the nuisance this evening, with a light breeze blowing from the north. Chemical smell started at about 15:00 when a white tanker truck was spraying liquid on the access road to the Waste Connections pad site. Scent increased until about 16:15, then started to dissipate, only to resume again at 18:30. This second round started as the usual pattern of something like insectide, increasing in pungency over 30-40 minutes to a strong blend of machine oil, diesel exhaust and rubber. At 19:30 it is strong enough to make eyes water.
<b>Well or facility name and number (If known).</b>	Waste Connections
