**Subject: Lipplemann “P” Landfarm Sampling Results  
COGCC Remediation #9058**

Dear Terry:

Nicholson GeoSolutions LLC was retained by HRM Resources II LLC (HRM) to conduct soil sampling of the landfarm on the Lipplemann “P” lease, Washington County, Colorado. Sampling of the landfarm was conducted at the required rate of approximately one sample per 100 yards of material on May 16<sup>th</sup>, 2017. The landfarm was previously sampled on October 18<sup>th</sup>, 2015, May 25<sup>th</sup>, 2016, and October 29<sup>th</sup>, 2016.

GPS mapping showed that three landfarm cells cover a total of about 0.38 acres and contain an estimated 980 yards of material. Eleven discrete soil samples were collected at depths of approximately 12-16 inches from approximately the same locations as those previously collected. The extent of the landfarm cells and the locations of the samples are shown on Figure 1.

All samples were analyzed for Total Volatile Petroleum Hydrocarbons (TVPH – gasoline range), Total Extractable Petroleum Hydrocarbons (TEPH – diesel and motor oil range) and BTEX (benzene, toluene, ethylbenzene, and xylenes) to evaluate compliance with the COGCC Table 910-1 standards and further treatment needs. SAR, pH, and conductivity were previously analyzed in October 2016 for the landfarm samples from this site. All SAR and conductivity results were below the standards. The pH exceeded the standard for 5 of 11 samples.

Table 1 provides a summary of the analytical results for the samples. The laboratory report is contained in Appendix A. For the May 2017 sampling event, the sum of the concentrations of gasoline, diesel, and motor oil range petroleum hydrocarbons (total petroleum hydrocarbons [TPH]) exceeded the COGCC standard of 500 mg/kg for nine of the 11 samples and ranged from 327 mg/kg to 2,730 mg/kg.

**Table 1 Lippemann “P” Landfarm Sample Results – May 16, 2017**

	Table 910-1 Standards	Lippemann LF-1	Lippemann LF-2	Lippemann LF-3	Lippemann LF-4	Lippemann LF-5
TVPH – gasoline range	500 <sup>1</sup>	<b>0.189</b>	<b>0.148</b>	<b>0.107</b>	<0.1	<0.1
TEPH – diesel/motor oil range		<b>1,569</b>	<b>2,730</b>	<b>1,032</b>	<b>1,111</b>	327
benzene	0.17	0.00199	0.00164	0.000918	<0.0005	0.000515
toluene	85	<0.005	<0.005	<0.005	<0.005	<0.005
ethylbenzene	100	<0.0005	<0.0005	<0.0005	<0.0005	<0.0005
xylenes	175	0.00159	<0.0015	<0.0015	<0.0015	<0.0015

	Standards	Lippemann LF-6	Lippemann LF-7	Lippemann LF-8	Lippemann LF-9	Lippemann LF-10	Lippemann LF-11
TVPH	500 <sup>1</sup>	<b>0.139</b>	<b>0.162</b>	<0.1	<b>0.151</b>	<b>9.81</b>	<b>1.49</b>
TEPH		<b>1,086</b>	<b>775</b>	441	<b>533</b>	<b>1,427</b>	<b>943</b>
benzene	0.17	0.00123	0.00136	0.00176	0.00251	<0.0005	0.00431
toluene	85	<0.005	<0.005	<0.005	<0.005	<0.005	<0.005
ethylbenzene	100	<0.0005	<0.0005	0.000616	0.000842	<0.0005	<0.0005
xylenes	175	<0.0015	<0.0015	0.00153	0.00194	0.156	0.036

<sup>1</sup>The standard is 500 for the combined total of TVPH and TEPH All units in mg/kg

Values in bold type exceed standards

Table 2 provides the TPH results for the October 18<sup>th</sup>, 2015 and May 16<sup>th</sup>, 2017 samples and the percent difference between the two samples at each sample location. TPH ranged from 932 mg/kg to 8,160 mg/kg for the October 2015 samples and from 327 mg/kg to 2,730 mg/kg for the May 2017 samples. The TPH concentration was lower for the May 2017 samples at 10 of the 11 sample locations and higher at one location.

**Table 2 Comparison of TPH Results, October 18, 2015 and May 16, 2017**

Sample Location	TPH (mg/kg) October 18, 2015	TPH (mg/kg) May 16, 2017	%Difference
Lippemann-LF-1	932	1,569.2	68.4
Lippemann-LF-2	7,351	2,730.2	-62.9
Lippemann-LF-3	2,339	1,032.1	-55.9
Lippemann-LF-4	3,155	<b>1,111</b>	-64.8
Lippemann-LF-5	4,951	327	-93.4
Lippemann-LF-6	2,874	1,086.2	-62.2
Lippemann-LF-7	5,840	775.2	-86.7
Lippemann-LF-8	1,582	441	-72.1
Lippemann-LF-9	8,160	533.2	-93.5
Lippemann-LF-10 <sup>1</sup>	65,653	1,436.8	-97.8
Lippemann-LF-11 <sup>1</sup>	2,449	944.5	-61.4

<sup>1</sup>comparison is between May 25<sup>th</sup>, 2016 and May 16, 2017

Table 3 provides summary statistics for the two sampling events. The average TPH concentration for the eleven samples decreased from 4,132 mg/kg to 1,090 mg/kg between October 18<sup>th</sup>, 2015 and May 16<sup>th</sup>, 2017. The median concentration dropped from 3,155 mg/kg to 1,032 mg/kg. Using the results provided above in Table 2, the average % TPH decrease for the overall landfarm was -73.6%.

**Table 3      Summary Statistics for the October 2015 and May 2017 Samples**

Sample Date	Minimum	Maximum	Average	Median	Average % Difference
Oct 18, 2015	932	8,160	4,132	3,155	
May 16, 2017	327	2,730	1,090	1,032	-73.6

Using the difference between the average TPH concentrations of 3,042 mg/kg, and the time period of 576 days, a biodegradation rate of 5.28 mg/kg-day is obtained. Using these data, and assuming a linear rate of decay, approximately 112 days of treatment remain to reach the standard of 500 mg/kg. The actual time required to reach the standard may be more than estimated if the decay is not linear.

Based on the analytical results, bioremediation of the TPH contained in the soils in the landfarm cells at the Lippelmann "P" lease is occurring. Tilling of the landfarm was performed on March 14<sup>th</sup> and April 25<sup>th</sup> during 2017. In addition, a nitrogen fertilizer was added during the April 2017 tilling. Additional treatment of the landfarm cells including tilling and the addition of water during dry periods will be conducted prior to the next sampling event in October 2017.

All sample aliquots were received at the correct temperature, in the proper containers, with the appropriate preservatives, and within method specified holding times. All MDL (LOD) and RDL (LOQ) values reported for environmental samples have been corrected for the dilution factor used in the analysis. All Method and Batch Quality Control are within established criteria except where addressed in this case narrative, a non-conformance form or properly qualified within the sample results. By my digital signature below, I affirm to the best of my knowledge, all problems/anomalies observed by the laboratory as having the potential to affect the quality of the data have been identified by the laboratory, and no information or data have been knowingly withheld that would affect the quality of the data.

## Abbreviations and Definitions

SDG	Sample Delivery Group.
MDL	Method Detection Limit.
RDL	Reported Detection Limit.
ND	Not detected at the Reporting Limit (or MDL where applicable).
U	Not detected at the Reporting Limit (or MDL where applicable).
RPD	Relative Percent Difference.
Original Sample	The non-spiked sample in the prep batch used to determine the Relative Percent Difference (RPD) from a quality control sample. The Original Sample may not be included within the reported SDG.
(S)	Surrogate (Surrogate Standard) - Analytes added to every blank, sample, Laboratory Control Sample/Duplicate and Matrix Spike/Duplicate; used to evaluate analytical efficiency by measuring recovery. Surrogates are not expected to be detected in all environmental media.
Rec.	Recovery.

## Qualifier      Description

B	The same analyte is found in the associated blank.
J	The identification of the analyte is acceptable; the reported value is an estimate.
J2	Surrogate recovery limits have been exceeded; values are outside lower control limits.
J6	The sample matrix interfered with the ability to make any accurate determination; spike value is low.
J7	Surrogate recovery cannot be used for control limit evaluation due to dilution.

ESC Lab Sciences is the only environmental laboratory accredited/certified to support your work nationwide from one location. One phone call, one point of contact, one laboratory. No other lab is as accessible or prepared to handle your needs throughout the country. Our capacity and capability from our single location laboratory is comparable to the collective totals of the network laboratories in our industry. The most significant benefit to our "one location" design is the design of our laboratory campus. The model is conducive to accelerated productivity, decreasing turn-around time, and preventing cross contamination, thus protecting sample integrity. Our focus on premium quality and prompt service allows us to be **YOUR LAB OF CHOICE**.

\* Not all certifications held by the laboratory are applicable to the results reported in the attached report.

All sample aliquots were received at the correct temperature, in the proper containers, with the appropriate preservatives, and within method specified holding times. All MDL (LOD) and RDL (LOQ) values reported for environmental samples have been corrected for the dilution factor used in the analysis. All Method and Batch Quality Control are within established criteria except where addressed in this case narrative, a non-conformance form or properly qualified within the sample results. By my digital signature below, I affirm to the best of my knowledge, all problems/anomalies observed by the laboratory as having the potential to affect the quality of the data have been identified by the laboratory, and no information or data have been knowingly withheld that would affect the quality of the data.

## Abbreviations and Definitions

SDG	Sample Delivery Group.
MDL	Method Detection Limit.
RDL	Reported Detection Limit.
ND	Not detected at the Reporting Limit (or MDL where applicable).
U	Not detected at the Reporting Limit (or MDL where applicable).
RPD	Relative Percent Difference.
Original Sample	The non-spiked sample in the prep batch used to determine the Relative Percent Difference (RPD) from a quality control sample. The Original Sample may not be included within the reported SDG.
(S)	Surrogate (Surrogate Standard) - Analytes added to every blank, sample, Laboratory Control Sample/Duplicate and Matrix Spike/Duplicate; used to evaluate analytical efficiency by measuring recovery. Surrogates are not expected to be detected in all environmental media.
Rec.	Recovery.

## Qualifier      Description

V	The sample concentration is too high to evaluate accurate spike recoveries.

ESC Lab Sciences is the only environmental laboratory accredited/certified to support your work nationwide from one location. One phone call, one point of contact, one laboratory. No other lab is as accessible or prepared to handle your needs throughout the country. Our capacity and capability from our single location laboratory is comparable to the collective totals of the network laboratories in our industry. The most significant benefit to our "one location" design is the design of our laboratory campus. The model is conducive to accelerated productivity, decreasing turn-around time, and preventing cross contamination, thus protecting sample integrity. Our focus on premium quality and prompt service allows us to be **YOUR LAB OF CHOICE**.

\* Not all certifications held by the laboratory are applicable to the results reported in the attached report.
