Permit	Final review complete.	06/23/2017
Engineer	Offset water well check: Offset water well check: There are no permitted water wells within one mile of this proposed surface hole location. Operator's geologic prognosis indicates the proposed surface casing will cover the entire Green River formation. Offset Well Evaluation: Existing offset oil and gas wells within 1,500 feet of this wellbore meet standards. No mitigation required.	06/19/2017
Permit	Operator states that they will run logs as per the logging BMP even though there were logs run on the 43-32 well (API 045-14112), therefore BMP for 317.p is accurate. Preliminary review complete.	06/09/2017
Permit	Passed Completeness.	05/25/2017
Permit	Returned to draft per operator's request.	05/19/2017
