Re: Request for Rule 317.p Exception (Open-Hole Logging Requirements)

Well Name	Document #
Kiyota 4M-35H-O367	401297647
Kiyota 4N-35H-O367	401297949
Kiyota 4O-35H-O367	401297959

SWSE Sec 35 T3N R67 Weld County, CO

Dear Mr. Lepore:

Please let this letter serve as a request for a Rule 317.p Exception for the proposed wells listed above. Rule 317.p requires logging all wells with a minimum of a resistivity log with gamma ray to adequately describe the stratigraphy and open-hole logs to adequately verify the setting depth of surface casing and aquifer coverage.

Crestone Peak Resources is requesting to run a combination RST/CBL (reservoir saturation tool using pulsed neutron) cased hole log of one of the first wells to be drilled on the pad with the best chance of success from approximately 500' to 6500' MD.

Crestone Peak has identified an existing well with Induction logs that are within 750' of the proposed wells' surface hole locations. See chart below.

Well	API	SHL	Avg. Distance from proposed wells	Bearing	Log on file Document No.
Kiyota 34-35	123-19727	657 FSL, 1960 FEL, 35 3N 67W	535'	NW	Dual Induction, #1014986

All of the captioned wells will have a cement bond log with gamma ray run from the KOP, or as close as possible, to above surface casing shoe to verify the setting depth of surface casing and aquifer coverage. The horizontal portion of all subject wells will be logged while drilling with a gamma ray tool.

Suite 2500 - 1801 California St., Denver, CO 80202

Phone: 720 410 8500 Fax: 720 410 8510

www.crestonepeakresources.com

The Form 5 for each well shall clearly state, "No open hole logs were run" and shall reference the Rule 317.p Exception granted for the well. The Form 5 for each well on the pad will identify the well that was logged with alternative logs by API number, well name and well number.

Thank you for your assistance with this matter. If you have any questions or comments, please contact me at 720-410-8478

Sincerely,

Ryan Bruner
Regulatory Analyst
