Commission
Department of Natural Resources

Inspection Photos
Operator: NOBLE ENERGY INC - 100322
Location ID: 328534

Photo 1: Photo taken from the well location, facing east. Photo shows well has been plugged and removed. If compaction alleviation has not yet been performed, well will require cross ripping as well as revegetating to reflect the adjacent reference area.

Photo 2: Photo taken from the well location, facing north. Photo shows access road has yet to be reclaimed. Access road appears to require compaction alleviation, re-contouring, re-grading and re-vegetation. Reclamation rule 1004.a requires all such reclamation work be completed within twelve (12) months on non-crop land after plugging a well.

Location ID: 328534

Photo 4: Photo taken from the north end of the battery location, facing south west. Photo shows equipment at the battery facility have been removed. Battery location waiting additional reclamation activities; location appears to still require road base removal, compactions alleviation, re-contouring, re-grading and re-vegetation. Reclamation rule 1004.a requires all such reclamation work be completed within twelve (12) months on non-crop land after plugging a well.

Photo 5: Photo taken from the north end of the battery location, facing south west. Photo shows equipment at the battery facility have been removed. Battery location waiting additional reclamation activities; location appears to still require road base removal, compactions alleviation, re-contouring, re-grading and re-vegetation. Reclamation rule 1004.a requires all such reclamation work be completed within twelve (12) months on non-crop land after plugging a well.
