

Photo 1: View of the project area from the northeastern corner facing center.

Photo 2: View of the northern portion of the project area from the northeastern corner of the well pad facing eastward. Revegetation is progressing with grasses, shrubs, and forbs such as James galleta (*Pleuraphis jamesii*), rubber rabbitbrush (*Chrysothamnus nauseosus*), and winterfat (*Krascheninnikovia lanata*).

Photo 3: View of the eastern portion of the project area from the northeastern corner of the well pad facing southward.

Photo 4: View of wattle full of sediment.

Photo 5: View of reference area at approximately 38.048636, -108.634825.

Vegetation observed includes the following*:

- Greasewood (*Sarcobatus vermiculatus*)
- Snakeweed (*Gutierrezia sarothrae*)
- Globemallow (*Sphaeralcea coccinea*)
- Western wheatgrass (*Pascopyrum smithii*)
- Black sagebrush (*Artemisia nova*)
- Squirreltail (*Elymus elymoides*)
- Purple three-awn (*Aristida purpurea*)
- Yellow rabbitbrush (*Chrysothamnus viscidiflorus*)
- Prickly pear (*Opuntia* sp.)

*Due to the season, additional species are likely dormant or unidentifiable.
