

Photo 1: View of the project area from the northwestern corner facing center.

Photo 2: View of the northern portion of the project area from the northwestern corner of the well pad facing eastward. Revegetation is progressing with grasses and forbs such as western wheatgrass (*Pascopyrum smithii*), crested wheatgrass (*Agropyron cristatum*), and alfalfa (*Medicago sativa*).

Photo 3: View of the eastern portion of the project area from the northeastern corner of the well pad facing southward.

Photo 4: View of diversion that is eroding in the southeastern portion of the project area, that feeds to the silt trap in Photo 5. Stormwater controls should be applied to de-energize flows in this diversion.

Photo 5: View of silt trap along the eastern edge of the project area.
