Comment:

	<p>Reclamation Rule 1004.a. requires reclamation activities to be conducted within twelve months of plugging on non-cropland. Well was plugged 5/20/2014. This location does not meet reclamation requirements. The removal of all equipment has not been performed nor does it appear any reclamation work has been performed. A gravel pile and gravel remains at the well location; weedy, annual vegetation was observed which is not reflective of reference area vegetative levels. Two (2) List B CO Noxious weeds, Scotch thistle and Canada thistle, were observed and flowering at the location. Please refer to the attached inspection photos for more details.</p>	
Corrective Action:	<p>Corrective Action (CA) #1: Since the spring seeding window has passed, revegetation activities shall be complete no later than 11/15/17. CA #2: The following shall be performed by 8/31/17: Comply with Reclamation Rule 1004.a. to remove (regardless of ownership) all equipment, remove gravel from location, perform compaction alleviation, manage weeds and ensure temporary stabilization controls are in place until revegetation activities can occur later in the Fall. See COGCC comments for additional compliance information regarding revegetation.</p>	Date 08/31/2017

COGCC Comments

Comment	User	Date
Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed.	binschusc	08/03/2017
It should be noted the access road was never re-contoured or re-graded but sufficient vegetation has established throughout the access road to meet Rule 1004 vegetation requirements.	binschusc	08/03/2017
