General Comment:

Date of Inspection: 7-27-17
Type of Inspection: Flowline Hydrostatic Testing, Interim Reclamation, Containment, Stormwater
Location Name: Evelyn Payne Gas Unit F 1 Pad; Evelyn Payne F 1 and lateral
Location ID #: 325845
Form 2A# 401239603
API #: 05-067-07069

Construction stormwater BMPs for well pad (perimeter berm, diversion trenches, silt fences, straw wattles, rock check dams, and other spill stormwater control equipment) and access road (borrow ditch with rock check dams for sediment control) are in-place and these stormwater controls indicate no offsite migration of fluids or sediment; existing stormwater controls indicate no offsite migration of fluids or sediment to nearby ditch west of the well pad; cut and fill slopes have been partially to mostly re-vegetated; observed hydrostatic static testing of onsite water and gas flowlines from the wellhead to the separator and take away pipelines; all flowlines and pipelines were tested a minimum of 2 hours at pressures greater than estimated operating pressures (>950 psi); all flowlines and pipelines passed.
