CORRECTIVE ACTIONS:

1 ☒ CA# 85971

Corrective Action: Securely fasten all valves, pipes, and fittings to ensure good mechanical condition, inspect at regular intervals and maintain in good mechanical condition per Rule 605.d. Control and contain spills/releases and clean up per Rule 906.a. Contact COGCC EPS staff.

Date: 08/14/2017

Response: CA COMPLETED Date of Completion: 08/08/2017

The oil stained soil was cleaned up ( 1 - 5 gallon bucket of soil). This stain was of an unknown origin. This tank is not connected to the well or any other tank. I suspect it was a spilled bucket on the surface. All valves on this

Operator  
Comment: tank are in good working order.

A flow line pressure test was conducted on the 2" sch. 40 flow line (water line) next to the other water stained area noticed by the inspector. This test was a fail. On 8/8/2017 a 2" section of the flow line was found to be cracked, this was replaced. On this same day, after replacing the defective pipe I conducted a 2nd flow line pressure test @ 35 psi. This test was a pass. The faulty section of pipe has been remedied.

COGCC Decision: Approved pending re-inspection

COGCC  
Representative: Approved pending re-inspection.
