Remarks

Where there is a quantitative threshold, a qualitative threshold or a threshold which is not a quantitative threshold, the threshold is a physical or non-physical parameter, or recommendation which may be given by Wexel, or a combination thereof, which may appear in the course of the research. Any person or entity which is not a member of the research team and who is not a member of the research team agrees that Wexel is not responsible for the use of the threshold.

This is a vertical log plot with a grid background. The plot contains several curves and labels:

- T CURVE:** A highly oscillatory curve on the left side of the plot.
- GAMMA RAY:** A curve on the left side, below the T CURVE.
- PIPE CURVE:** A curve on the right side, labeled with an arrow.
- FORMATION CURVE:** A curve on the right side, labeled with an arrow.
- PROBABLE CEMENT TOP:** A label with an arrow pointing to a specific depth on the right side of the plot.
- Depth Markers:** Numerical values 5300 and 5400 are placed on the right side of the plot.
- Wellbore Profile:** A vertical line with several horizontal tick marks representing the wellbore structure.
