Comment:

The access road and location have not been recontoured. There is gravel along the access road and in areas at the location. There is no equipment or debris that remains. There are stormwater BMP's in place and no erosion issues were noticed. There are areas at the west side of the location where vegetation has not yet established. There is straw mulch still present which indicates seeding and mulching were recently performed. Additional growing seasons may be needed to adequately establish vegetation in areas where gravel is not present. See Attached Photos
