General Comment:

This is an orphan well inspection with emphasis on critical maintenance and abandonment. None of the previously identified corrective actions have been performed, corrective actions are still required.

With no current operator this orphan well inspection included portions of May 2017 Flowline NTO to mark and inventory flowline risers. Due to location conditions and with no operator to provide assistance this inventory is informational only and may not identify all flowlines and risers.

See link at end of report for path to downloadable pictures.

Location has a domestic tap that appears to be in use. Valves are open at wellhead.

Idle Well

Purpose: Shut In Temporarily Abandoned Reminder: _____

Comment: TA - Pump jack motor removed. Review of electronic well file record indicates well reported as TA since January 2014. Well was reported as SI from December 2006 until December 2013. Last reported production of oil and gas was 76/0 in November 2006. No MIT in electronic well file.

Corrective Action: _____ Date: _____

COGCC Comments

Comment	User	Date
If well is not returned to production tasks will likely include P&A, production equipment removal, removal/abandonment of 4 flowlines, identification and removal of electrical service, site clean up, impacted material removal, removal of rig anchors and junk & debris. Completion of final reclamation of location and access road.	stjohnw	08/22/2017
