General Comment:

This is a follow-up final reclamation inspection to FIR Document # 682402463. This is the second consecutive corrective action to remove equipment from location and perform final reclamation activities. Corrective actions from the previous inspection were not resolved; therefore, the corrective action dates on this inspection remain the same from the previous inspection.

Comment: ☐ Multiple Spills and Releases?**Equipment:**

Type:	#		corrective date
Comment:	One (1) meter shed remains at the location. See attached photos from the previous Field Inspection Report (Document #682402463). Comply with the reclamation rules to remove (regardless of ownership) all debris, abandoned gathering line risers, and flowline risers, and equipment within three months of plugging (2/4/2016) the associated facility. All work should have been conducted by 5/4/2016. See Reclamation Section for corrective actions and corrective action dates.

Comment: **Well was plugged 2/4/2016. This location does not meet reclamation requirements. The removal of all equipment has not been performed nor does it appear any reclamation work has been performed; gravel remains throughout the location which have not been recontoured or re-graded. Please refer to the attached inspection photos from the previous Field Inspection Report (Document #682402463) for more details.**

Corrective Action:	Corrective Action #1: Since the spring seeding window has passed, revegetation activities shall be complete no later than 11/15/17. Corrective Action #2: Comply with Reclamation Rule 1004.a. to remove (regardless of ownership) all equipment by 8/22/2017. Corrective Action #3: The following shall be performed by 8/22/17: Remove the meter shed equipment and culvert, remove gravel from location, perform compaction alleviation, and recontour/re-grade access road. Ensure temporary stabilization controls are in place until revegetation activities can occur later in the Fall. See COGCC comments for additional compliance information regarding revegetation. COGCC Comments

Comment	User	Date
Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed.	binschusc	08/23/2017
