RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

After pit has dried up and soil samples have been collected and tested, assuming the soil samples pass the Table 910-1 standard, the surface area of the pit will be restored to its original grade. Since the pit site lies within the fenced area of the tank battery facility, it will not be reseeded at this time. Weed control measures will be implemented.

OPERATOR COMMENT

Since the pit still contains some water, no work will begin until the pit has dried up. We hope to be able to collect soil samples in early November 2017 and will begin the actual pit closure on or about June 1, 2018 [assuming the pit is dry enough at that time].

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
