General Comment:

Copied inspection only to file per landowner. Per landowner, well was originally drilled as a water well, gas came out during drilling at ~660' when well was then converted to a domestic gas well to heat the garage in the winter (~2 cfs). A small amount of water discharges from the well through a pipe in the garage and only in the winter. The small well is located on the NW corner under the back deck. GPS coordinates were accurate. Inspector and landowner contacted COGCC Production during the inspection and asked if any paperwork was required of the landowner and the answer was no. The landowner indicated that a plugging bond was in place.
