**Attachments:** insp\_401377106.pdf; Warren 1-2.pdf

Anadarko,

We recently received a COGCC inspection from a former Noble well (Warren 1-2) that we assumed reclamation responsibility on but one of the corrective actions is to comply to Rule 1004 "Remove the pipe riser from the tank battery site. Remove the plastic pipe from the location and any other equipment or debris that may be present." The "pipe" in question is the sales line riser from the former battery which is Anadarko's line. Can you please add it to our list of sales line riser removals in the area?

Best regards,

**Blake Ford**
