August 24, 2017

On August 22, 2017 at approximately 3:40 p.m., I noticed a strong, intermittent odor at a residence approximately 1,000 feet south east of the Pratt drilling site (Facility ID: 434526). I would describe the odor as diesel fuel. I also noted that the wind appeared to be blowing at a low speed from the direction of the drilling site at the time of the detected odor.

Sincerely,

A handwritten signature in black ink, appearing to read 'Allie Bamber'.
