Corrective Action _____

Date _____

1002c. PROTECTION OF SOILS _____ In Process _____

Comment

The previous inspection documented that topsoil appeared to be salvaged along the south, east, north, and west perimeter of the location. These areas appear to be predominately weedy, annual vegetation. Appears the Operator has recently mowed these areas.

The Operator shall consider long-term stabilization BMPs when stabilizing topsoil stockpiles. Per Rule 1002, topsoil shall be stabilized and protected from degradation due to wind and water erosion. Per Rule 1002, BMPs to prevent weed establishment and to maintain soil microbial activity shall be implemented.

TRANSECT RESULTS OF DISTURBED AREA% _____

TRANSECT RESULTS OF REFERENCE AREA% _____

TOTAL % OF DESIRABLE VEGETATION COVER _____

VEGETATIVE COVER _____

1003 f. Weeds Noxious weeds? _____

Comment Operator shall comply with Rule 1003 to reclaim all areas not reasonably needed for production operations. There appears to be a significant portion of the western location that is not needed for production operations. A follow-up interim reclamation inspection will be conducted at a later date to ensure the Operator is in compliance with Rule 1003 standards. It appeared that the Operator was starting to perform interim reclamation activities at a nearby location (Location ID 432532); therefore, a corrective action was not issued. Refer to the attached inspection photos for more details.

Corrective Action Date _____

Overall Interim Reclamation Fail

Final Reclamation/ Abandoned Location:

Date Final Reclamation Started: _____ Date Final Reclamation Completed: _____

Final Land Use: RANGELAND

Reminder: _____

Comment:

Well plugged _____ Pit mouse/rat holes, cellars backfilled _____

Storm Water:

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment
Mulching	In Process					Only observed along the southwestern location
Sediment Traps	In Process					Southeast sediment trap= FAIL
Ditches	Pass					
Waddles	Pass					

Comment:	<p style="color: blue; font-size: small;">Appears the Operator has made some improvements to stormwater control BMPs; however, the southeast sediment trap does not appear to be sufficient or constructed with good engineering practices. Also, there appears to be significant portions of bare soil that are not stabilized. Operator shall install and repair the required BMPs. This work could be completed during interim reclamation activities. A follow-up inspection will be conducted to ensure the Operator is in compliance with Rule 1002.f. standards.</p>					
Corrective Action:						Date: _____

Pits: ☐ NO SURFACE INDICATION OF PIT
