

# Final Reclamation and Stormwater Inspection

September 7, 2017

Operator: LILIS ENERGY INC- #10495

API: 05-039-06608

Elbert County, CO

SWSE Section 10 T6S R64W

Chris Binschus  
Reclamation Specialist, COGCC

**COLORADO**  
Oil & Gas Conservation  
Commission

Department of Natural Resources

Inspection Photos  
Location Name: COGGINS #10-34  
API: 05-039-06608

**Photo 1.** Photo taken from the southern location, facing East. Germination was observed throughout most of the disturbance area; however, bare patches with little to no germination were observed. Germination is not uniform throughout the disturbance area.

**Photo 2.** Photo taken from the southern location, facing West. Photo illustrates a bare patch with no germination.

**Photo 3.** Photo taken from the southeastern location, facing South. BMP maintenance needed along a section of the silt fence.

Inspection Photos  
Location Name: COGGINS #10-34  
API: 05-039-06608

**Photo 4.** Photo taken from the western location, facing South. Photo illustrates another bare patch with no germination. Areas surrounding the bare patch did have evidence of germination. Photo 4 is a close up photo taken from the foreground of this photo.

**Photo 5.** Close up photo taken from the foreground of Photo 3. Photo illustrates germination is evident with a hydromulch application but germination is not uniform throughout the disturbance area.

Inspection Photos  
Location Name: COGGINS #10-34  
API: 05-039-06608

**Photo 6.** Photo taken from the north-central location, facing South. Weedy, annual vegetation has established throughout much of the location. Germination was observed within some of the weedy, annual vegetation.

**Photo 7.** Photo taken from the eastern location, facing South. Photo illustrates the establishment of reference area species, Smooth brome (*Bromus inermis*); however, other disturbance areas do not reflect this same germination establishment.

**Photo 8.** Reference photo taken just east of the location, facing South. Reference area vegetative growth mainly consists of Smooth Brome (*Bromus inermis*).
