#### COMMENTS:

Due to an error of the elevation of the wellpad on the Form 2, Catamount believes the surface casing set depth for the subject well was too deep. Catamount would like to change the casing set depth to 350'. Per conversation with the COGCC engineer on 9/12/17, the elevation of the wellpad was changed to the correct heighth of 6456' from 6752' (which was originally on the Form 2) after the initial review. Please call with questions.
